

Carbon Monoxide Generator Safety

Run Generators No Less Than 20ft from any Building

Always use your generator at least 20 feet from any door, window, vent or occupied structure like an RV, camp tent, basement, shed or garage.

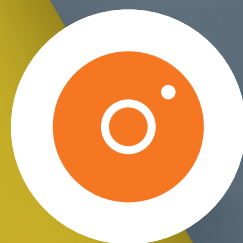

Recognize CO Poisoning Symptoms

CO poisoning causes disorientation, headache, dizziness, weakness, nausea, vomiting, chest pain, unconsciousness and death.

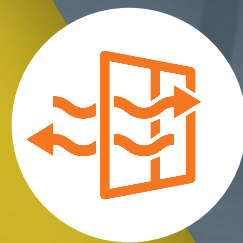

Use an NFPA Rated Generator Tent

Use a generator running cover like GenTent® to properly use your generator a safe distance outside in wet weather.

Use Carbon Monoxide Alarms

Install a CO alarm on every level of your home and near sleeping areas. Test them once monthly.

Consider Your Exhaust

Point your generator exhaust away from all vents, windows and areas with people.
