

WeatherProof Your Power™
Running Cover for
Portable Generators

Portable generator manufacturers warn to NEVER run a generator indoors due to risks of CO poisoning.

TAKE IT OUTSIDE™

CARBON MONOXIDE KILLS

Portable generator manufacturers warn to NEVER operate a generator in wet weather conditions due to risk of electrocution and damage.

Generator produces powerful voltage. DO NOT operate under wet conditions.

Emergency Backup

- + Protect your family during weather events and natural disasters.
- + Avoid CO hazards posed by running generator near your living space.

GenTent® provides a practical, affordable solution for running your portable or inverter generators outdoors safely in inclement weather.

GenTent® is the only weather-proven product on the market that encourages outdoor generator use while minimizing electrocution and damage risks.

Recreational

- + Take your power outdoors safely. GenTent is light weight and portable.
- + Cover up to two inverter generators in parallel with one canopy.

Commercial

- + Run your business from anywhere while being prepared for any weather.
- + Safeguard your business' portable power investment.

Finally, a safe way to run your Portable Generator in Wet Weather
